APPLICATION FOR PERMIT TO CONSTRUCT ACROSS OR ALONG A STREAM
AND / OR WATER QUALITY CERTIFICATION

Chapter 151 of the Kentucky Revised Statutes requires approval from the Division of Water prior to any construction or other activity in or along a stream that could in any way obstruct flood flows or adversely impact water quality. If the project involves work in a stream, such as bank stabilization, dredging or relocation, you will also need to obtain a 401 Water Quality Certification (WQC) from the Division of Water. This completed form will be forwarded to the Water Quality Branch for WQC processing. The project may not start until all necessary approvals are received from the KDOW. For questions concerning the WQC process, contact John Dovak at 502/564-3410.

If the project will disturb more than 1 acre of soil, you will also need to complete the attached Notice of Intent for Storm Water Discharges, and return both forms to the Floodplain management Section of the KDOW. This general permit will require you to create an implement an erosion control plan for the project.

Art:

Please find attached an application for a Permit to Construct Across or Along a Stream / Water Quality Certification for the captioned property. Also included are a plan view exhibit and USGS topo map. The project involves the construction of lots for a residential development that would impact 580 linear feet of ephemeral stream. The watershed area for the project is 40 acres (0.062 miles).

If you have any questions or require any additional information, please do not hesitate to contact us at 859-296-9889 at your convenience.

Sincerely,

EA PARTNERS, PLC
